Summary

Software Engineer with 1.5+ years of experience building intelligent web and mobile applications using React.js, Next.js, React Native, TypeScript, Node.js, and Python. Experienced in integrating OpenAI, Claude, and modern AI frameworks to build LLM-powered features, AI agents, workflow automation, and scalable full-stack applications.

Technical Skills

Frontend: React.js, Next.js, React Native, JavaScript (ES6+), TypeScript, Redux, HTML5, CSS3, Tailwind CSS
AI & LLMs: OpenAI API, Claude API, Prompt Engineering, AI Agents, Function Calling, RAG
AI Libraries & Frameworks: LangChain, LangGraph, AI SDK, MCP (Model Context Protocol)
Backend: Node.js, FastAPI, Python, REST APIs, WebSocket, Firebase
Databases: PostgreSQL, Firebase Firestore, Vector Databases
Tools: Git, GitHub, Docker, Postman, Vercel

Experience

Tradio

Sep 2025 – Jan 2026

Software Developer

Remote

- Architected and shipped an AI-powered trading journal platform using React.js, Next.js, and Firebase.
- Built a cross-platform algorithmic trading mobile application in React Native, published to store with a reusable, performance-optimized component architecture
- Integrated OpenAI build AI-assisted trading insights, prompt-based workflows, and automation features.
- Implemented WebSocket-based real-time data flows enabling low-latency UI updates for active trading strategies.
- Designed an AI agent for the algorithmic trading platform using MCP (Model Context Protocol) and LLM function calling, integrating broker APIs and live market data feeds as callable tools to enable autonomous price fetching and trade execution based on strategy signals.

Raasta R&D

Sep 2024 – Aug 2025

Software Developer

India

- Developed and deployed a production-ready company website with blogs, admin dashboard, and SEO optimization using Next.js.
- Built an end-to-end RAG pipeline in Python to process 50,000+ PDFs — extracting and chunking text, generating embeddings, indexing into a vector database, and retrieving semantically relevant context for LLM-powered query responses, significantly reducing manual data extraction effort.
- Built internal dashboards, RBAC systems, and API-driven tools for organizational workflows.
- Represented Raasta R&D at a national-level AI/ML workshop hosted by G.B. Pant National Institute of Himalayan Environment, Almora, delivering technical sessions to 50+ attendees.

Education

Graphic Era Hill University

2022 – 2025

Bachelor of Computer Applications | CGPA: 8.2

Uttarakhand, India

Certifications

Complete React Developer (Redux, Hooks, GraphQL) – Udemy
React Native Essential Training – LinkedIn Learning
Agile Software Development – LinkedIn Learning
Docker Foundations Professional Certificate

Publications & Writing

Technical article published on GeeksforGeeks with 500+ views.
Authored and published independent technical blogs.
